

Project 1 Design Document

Priamos Koumas

Professor Guerra

CS 5610

May 26, 2026

Project Description:

- The Homepage Project is designed to display information about Priamos Koumas in a visually pleasing and interactive manner that can best describe different facets of who I am to all types of users, especially technical recruiters. The goal is to present this through three main pages: two designed by myself and a third generated by Artificial Intelligence. Each page describes a different aspect of my identity, with an About Me section, a Resume section, and a Contact section. Essentially, the motive is to create a digital portfolio that showcases what I have accomplished throughout my life in order to attract both personal and professional interest.

User Stories:

- As a technical recruiter, I want to be able to understand what the developer has accomplished academically and professionally, so I can see if the individual is a right fit for the company.
- As a department coordinator, I want to be able to understand if the user has published any form of research, in order to see if they are up to the standard of being a part of this PhD program.
- As a classmate, I want to be able to see if the developer has similar hobbies as myself, so that I can potentially reach out and arrange plans to hang out outside of the classroom.

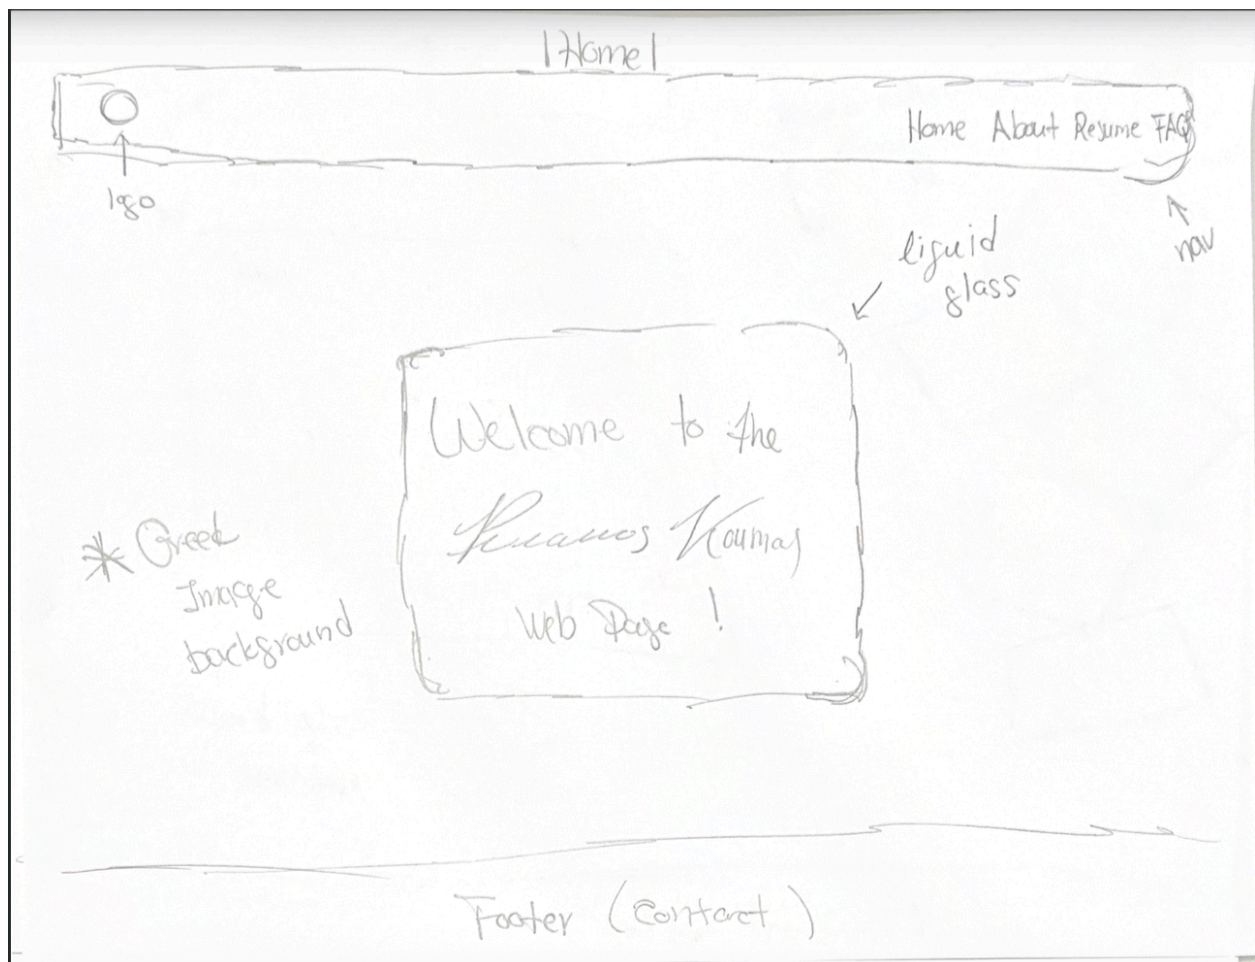

User Personas:

- Technical Recruiter Denise for Boston Dynamics
 - Demographic: 32 years old, lives in Boston, MA in a single household
 - Role/Goal: Determine if Priamos is the right fit for the company she works for based on the skills that he brings to the table.
 - Frustration: Has gone through hundreds of digital portfolios/resumes and cannot find the right individuals that can live up to the standard of working for a prominent company like Boston Robotics.
 - Needs: Find graduates with a Master's degree that has a high GPA and has shown genuine interest in their major through projects and research.
- College Coordinator Gabriel for New York University: Tandon College
 - Demographic: 54 years old, lives in Brooklyn, NY, with his family

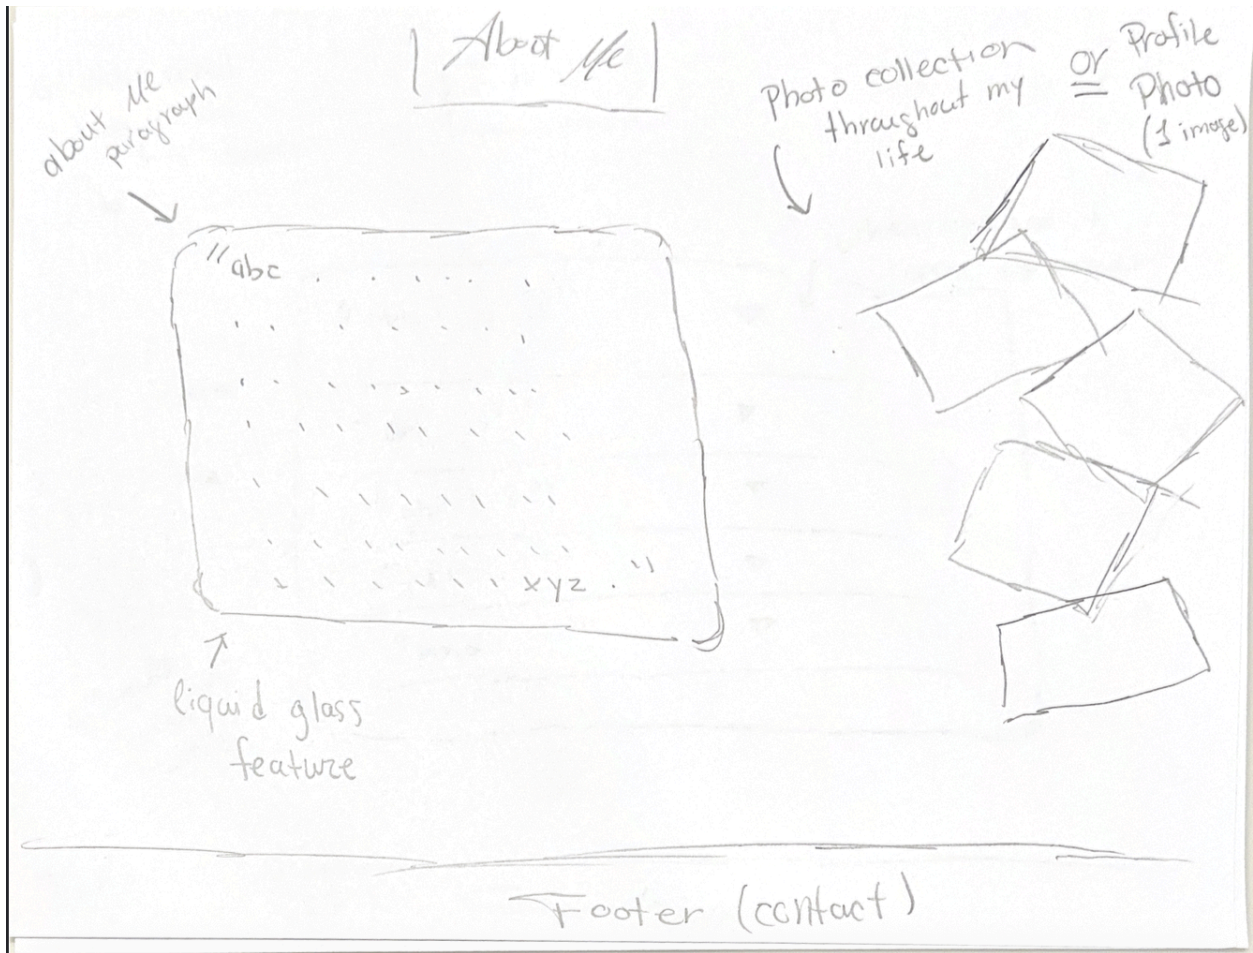

- Role/Goal: Determine if the applicants have the right criteria to pursue a specific PhD Program within their own college of the university.
 - Frustration: Too many applicants are applying without research and/or only a bachelor's degree; wants to see more experience
 - Needs: Find the next generation of Professors, who want to make an impact within Tandon College, completing research and teaching courses
- Classmate Stephen at Northeastern University
 - Demographic: 23 years old, lives in Providence, RI, in a single household
 - Role/Goal: New to the university lifestyle and wants to find the right company in his new chapter in life.
 - Frustration: Outside comfort zone and wants to develop a solid community to keep in touch with that share similar interests.
 - Needs: Wants to find students his age to hang out with outside of the classroom, and take part in activities that all parties find enjoyable.
